Consulting / service focus

- Single project, multi-project and program management
- Project and Program Management Systems: methods, processes, tools and technical content
- Simultaneous Engineering (SE) for the entire Product and Production Development Process (PDP)
- Advanced Product Quality Planning (APQP) and Quality Management Systems (ISO 9001 / IATF 16949)
- Project and customer-oriented business process management
- Collaboration between project/SE-teams, customers and suppliers

My consulting services include needs-oriented analysis, new and further development, optimization, implementation support and accompanying audits and coaching.

Consulting goals

- Successful single projects: quality, timing, costs, customer satisfaction
- Efficient project, program and portfolio management
- Systematic advanced product quality planning e.g. acc. to APQP
- Effective quality management acc. to ISO 9001 or IATF 16949
- Improved, simultaneous collaboration of all functions and teams
- Optimized customer and project-oriented business processes

Education / professional experience

- Doctorate at the Institute for Engineering and Industrial Design at the TU Stuttgart
- Graduate Engineer, Mechanical Engineering & Work Science at the TU Dresden
- Certified Transactional Analysis Consultant (DGTA)
- Certified Internal Auditor for QMS in Automotive (ISO 16949)
- Certified Process Accessor (ISO/IEC 15504)
- International trainings in project management and project coaching
